

This morning the Jolly Postman was knocked off his bike in the dark, just outside school. The poor old Jolly Postman has a broken leg but is getting better in hospital. We have been thinking about how to make the local area safer and how we can be safe in the dark. Over the next couple of weeks we will be:

1. Making safety clothing
2. Investigating how to make the local area safer — do we need better lighting or safety features around the school?
3. Creating road safety information and designing a road safety course for the children and wider community

The children might like to bring things in from home such as safety clothing, different materials to investigate, information they have found about the local area or ways to keep safe such as the Green Cross Code or anything else they can think of. On Monday they are also able to bring their own bikes or scooters. When you are in the local area, try and notice how safe it is and why.
