

This morning Mary Mary left all her gardening seeds and equipment in Jupiter Class! We have been thinking about how to plant her seeds and help her garden grow. Over the next week we will be thinking about:

1. Making a garden centre
2. Designing seed packets
3. Finding out how to look after plants
4. Deciding where to plant the seeds and mapping this
5. Making labels for the seeds we have planted
6. Planting and caring for seeds and bulbs of their own

The children might like to bring things in from home such as gardening tools (please make sure these are safe) and seeds/bulbs or pictures (photos or drawings) of their own garden. They might also find out how to grow and look after different plants. If you visit the gardening centre, the children can find out about the different things they sell and use this to help make our garden centre even better! If you are gardening, you might be able to let your child join in!
